

**COMPREHENSIVE SEMESTRAL REPORT ON FIELD PRACTICE AT
PHILIPPINE CENTER FOR POSTHARVEST DEVELOPMENT AND
MECHANIZATION (PHilMech)**

ROSANA MAE L. LABANIEGO

An Undergraduate Field Practice Submitted to the Faculty of the
Department of Agricultural and Biosystems Engineering, College of
Engineering, Central Luzon University, Science City
of Muñoz, Nueva Ecija in Partial Fulfillment of
the Requirements for the Degree

**BACHELOR OF SCIENCE IN AGRICULTURAL AND
BIOSYSTEMS ENGINEERING
(Agricultural Power, Energy and Machinery Engineering)**

MAY 2023

TABLE OF CONTENTS

	PAGE
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF APPENDIX TABLES	ix
LIST OF APPENDIX FIGURES	x
BIOGRAPHICAL SKETCH	xi
ACKNOWLEDGMENT	xii
ABSTRACT	xiv
INTRODUCTION	1
Background of the Field Practice	1
Objectives of the Field Practice	2
Activity 1. Testing of the Corn Mill	3
Activity 2. CAD Drawing and Fabrication of Corn Mill Outlet Scaled Model	3
Activity 3. Assist on Pre-Laboratory Testing of Mungbean Sheller Units	4
Activity 4. Functional Testing of the Coffee Moisture Meter	4
Significance of the Field Practice	4
Scope and Limitations of the Field Practice	5
Location and Duration of the Field Practice	5
REVIEW OF LITERATURE	6
Field Practice	6
Agricultural Mechanization	7
Corn Mill	7
Performance Criteria for Corn Mill	8
Methods of Test for Corn Mill	8
Mungbean Sheller	8
Performance Criteria for Mungbean Sheller	9
Methods of Test for Mungbean sheller	10
Testing Using Moisture Meter	10
Fabrication Requirements	11

METHODOLOGY	12
Conceptualization of the Field Practice	12
Activity 1. Testing of the Corn Mill	13
Test Materials and Equipment	13
Preparation of Samples	14
Principle of Operation	14
Weighing and Sampling	14
Laboratory Analysis	14
Determination of Performance Parameters	15
Main Product Recovery	15
By-product Recovery	15
Losses	16
Activity 2. CAD Drawing and Fabrication of Corn Mill Outlet	16
Scaled Model	
Designed Model	16
Engineering CAD Software	16
Process in 3D Modelling	17
Parts	17
Assembly	17
Drawing	17
Fabrication of the Corn Mill Outlet Scaled Model	17
Materials Used	17
Measuring and Drawing of Model	18
Cutting and Fixing the Model	18
Activity 3. Assist on Pre-Laboratory Testing of Mungbean Sheller Units	18
Test Materials and Equipment	18
Running-in and Preliminary Adjustments	19
Data Gathered	19
Speed of Components (RPM)	19
Air Velocity, (m/s)	19
Activity 4. Functional Testing of the Coffee Moisture Meter	19
Test Materials and Equipment	19
Preparation of Samples	20
Principle of Operation	20
Data Gathered	20
Moisture Content	20
RESULTS AND DISCUSSION	21
Activity 1. Testing of the Corn Mill	21

	PAGE
List of Test Materials and Equipment	22
Preparation of Samples	23
Repair and Maintenance of the Corn Mill	23
Principle of Operation	24
Weighing and Sampling	25
Laboratory Analysis of Milled Corn	26
Determination of Performance Parameters	27
Main Product Recovery	27
By-Product Recovery	28
Losses	28
Activity 2. CAD Drawing and Fabrication of Corn Mill Outlet	29
Scaled Model	
Designed Model	29
Engineering CAD Software Application	30
Process in 3D Modelling	31
Parts	31
Assembly	31
Drawing	32
Fabrication of the Corn Mill Outlet Scaled Model	34
List of Materials Used	34
Fabricated Corn Mill Outlet Scaled Model	35
Activity 3. Assist on Pre-Laboratory Testing of Mungbean Sheller Units	36
List of Test Materials and Equipment	37
Speed of Components	37
Airflow Velocity	39
Activity 4. Functional Testing of the Coffee Moisture Meter	40
List of Test Materials and Equipment	41
Preparation of Samples	42
Data Gathered	43
Moisture Content	43
 SUMMARY, CONCLUSION AND RECOMMENDATION	 44
Summary	44
Conclusion	45
Recommendation	46

LIST OF TABLES

TABLE		PAGE
1	Performance criteria for corn mill	8
2	Performance criteria for mungbean sheller	9
3	Minimum list of field and laboratory test equipment and materials for corn mill	22
4	Average grits recovery for laboratory analysis	26
5	Total main product recovery of the corn mill	28
6	By-product recovery of the corn mill	28
7	Minimum list of laboratory and engineering materials for corn mill outlet scaled model	34
8	Minimum list of field and test equipment and materials for mungbean sheller	37
9	Speed of components of mungbean sheller (350 RPM)	38
10	Speed of components of mungbean sheller (400 RPM)	38
11	Minimum list of field and laboratory test equipment and materials for coffee moisture meter	42
12	Moisture content reading, %	43

LIST OF FIGURES

FIGURES		PAGE
1	Conceptual framework of the field practice	13
2	Corn mill in Agricultural Mechanization Division (AMD)	21
3	Manual cleaning of corn kernel samples	23
4	Repair and maintenance of the corn mill	24
5	Schematic diagram of corn mill	25
6	Corn grits #10-12, #14-18, #>20, and bran samples	26
7	Percentage of actual losses	29
8	Corn mill outlet in Agricultural Mechanization Division (AMD)	30
9	CAD drawing of corn mill outlet	33
10	Corn mill outlet scaled model	35
11	Mungbean sheller in Agricultural Mechanization Division(AMD)	36
12	Airflow velocity of mungbean sheller (350 RPM)	39
13	Airflow velocity of mungbean sheller (400 RPM)	40
14	Coffee moisture meter	41
15	Robusta	42
16	Liberica	42
17	Excelsa	42

LIST OF APPENDIX TABLES

APPENDIX TABLE		PAGE
1	Corn mill testing data	56
2	Laboratory analysis data	56

LIST OF APPENDIX FIGURES

APPENDIX FIGURES		PAGE
1	Workplan of the field practice	50
2	Organizational chart	55
3	Isometric view of outlet main	57
4	Isometric view of suction	57
5	Isometric view of outlet chute	58
6	Isometric view of suction control gate	58
7	Isometric view of assembly of corn mill outlet	59
8	CAD drawing of outlet main	60
9	CAD drawing of suction	61
10	CAD drawing of outlet chute	62
11	CAD drawing of suction control gate	63
12	Workshop in Agricultural Mechanization Division (AMD)	64
13	Grain moisture meter	64
14	US standard sieves	65
15	Separation of corn grits and impurities	65
16	Determination of speed of components	66
17	Determination of airflow velocity	66
18	SolidWorks training	67
19	CAD drawing through SolidWorks	67
20	Fabrication of corn mill outlet scaled model	68
21	Field practice presentation at PHilMech	68
