## ACKNOWLEDGEMENT

First of all we want to thank our Almighty God, for without him we are nothing. God Give is strength to finish this study; even if we feel tired, and feel that we want to give up. He is the only reason we finish the journey of being a student. We know this is only the beginning of our journey. Thank you Father God for everything we owe you a lot.

To our beloved Parents, who are always been there for us, in good times or even in bad times. We thank you for not getting tired of supporting and encouraging us to finish our study. And also thank you for being our inspiration. We thank you for all the sacrifices and efforts that you gave us.

To our adviser Sir Robinson Lumuntod III, thank you for all the advice, efforts, and time that you gave us to improve our thesis. For your every appraising words for every thesis consultation. To our critic Sir Mark Allan Mananggit, thank you for all the advices, comments and suggestions to improve our thesis. Thank you for all the knowledge you share to us.

To our Participants, thank you for your time and effort on answering our questionnaire. Without you we have no participants and we may not finish our thesis. And we may not go this far if not with your help. Thank you and God bless!

To God be the Glory

-Jenny and Angel

Adviser: ROBINSON Z. LUMUNTOD 111

The primary purpose of this study is to know if there is a relationship between  
Sexualsatisfaction and Marital Commitment among Dual- earner Married couples in Talavera, Nueva  
Ecija. The study also wants to know the level of Sexual- satisfaction and Marital Commitment of  
Married couples. Also the study seeks to know the significant relationship of Sexual- satisfaction and  
Marital Commitment of married couples to their socio-demographic Characteristics. Using the  
standardized questionnaire based on the objectives: The first part of the instrument is socio-  
demographics which asked them their age, sex, job, number of children and length of marriage.  
Second part is a survey about their Sexual Satisfaction (Stulhofer.,Buöko, Brouillard&Kuljanié,  
2008). The third part of the questionnaire is a Marital Commitment Scale developed by Roach,  
Frazier and Bowden (1994) measure the participants' marital commitment.
