

**SCREENING FOR THE ANTIBACTERIAL PROPERTIES OF SELECTED
WEEDS AGAINST NON-MOTILE WATERBORNE
BACTERIA FROM CLSU**

RHONA JANE B. FABROS

An Undergraduate Thesis Submitted to the Faculty of the Department of Biological
Sciences, College of Arts and Sciences, Central Luzon State University,
Science City of Muñoz, Nueva Ecija, Philippines
In Partial Fulfillment of the requirements
for the Degree of

**BACHELOR OF SCIENCE IN BIOLOGY
(Major in Microbiology)**

JANUARY 2019

LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF APPENDICES	ix
LIST OF APPENDIX TABLES	x
LIST OF APPENDIX FIGURES	xi
ABSTRACT	xii
INTRODUCTION	1
Background of the Study	1
Objectives of the Study	2
Significance of the Study	3
Scope and Limitation of the Study	3
Time and Place of the Study	4
REVIEW OF RELATED LITERATURE	5
Weeds	5
Antibacterial Property	6
Waterborne bacteria	7
MATERIALS AND METHODS	8
Isolation, Morphological and Cultural Identification of Bacteria	
Source of Bacteria	8
Isolation of Bacteria	8
Purification of Bacteria	8
Cultural Identification of Bacteria	9
Morphological Identification of Bacteria	9
Simple Staining	10
Gram Staining Procedure	10
Motility Test	11
Collection and Identification of Weeds	
Evaluation of Antibacterial Activity Assay	12
Preparation of Samples	12
Preparation of Ethanol Extracts	12

Preparation of the Paper Disc	12
Treatment Preparation	13
Preparation of Bacterial Suspension	14
Antibacterial assay	14
Evaluation of Extract as Eradicant	14
Evaluation of Extract Protectant	15
Data to be Gathered	15
Statistical Analysis	16
RESULTS AND DISCUSSION	17
Isolation, Morphological and Cultural Identification of Bacteria	17
Collection and Identification of Weeds	20
Evaluation of Antibacterial Activity Assay	23
As Eradicant against <i>Bacillus</i> sp. and <i>Exiguobacterium</i> sp.	23
As Protectant against <i>Bacillus</i> sp. and <i>Exiguobacterium</i> sp.	27
SUMMARY, CONCLUSION, AND RECOMMENDATIONS	28
Summary	28
Conclusion	29
Recommendation	29
LITERATURE CITED	30
APPENDICES	34

LIST OF TABLES

TABLE		PAGE
1	Treatment Per Sample of Bacteria I	13
2	Treatment Per Sample of Bacteria II	13
3	Results of the cultural and morphological characterization of two bacterial isolates	20
4	List of authenticated weeds	20
5	Zone of inhibition of weed extracts after 48 hours of incubation against <i>Bacillus</i> sp. and <i>Exiguobacterium</i> sp.	24
6	Zone of colonization of weed extracts after 48 hours of incubation against <i>Bacillus</i> sp. and <i>Exiguobacterium</i> sp.	27

LIST OF FIGURES

FIGURES		PAGE
1	Cultural and morphological characteristics of <i>Bacillus</i> sp.; (A) Streak on NA slant (B) Gram staining.	17
2	Cultural and morphological characteristics of <i>Exiguobacterium</i> sp.; (A) Streak on NA slant (B) Gram staining.	19
3	<i>Phyllanthus urinaria</i> L	20
4	<i>Eleusine indica</i> L	22
5	<i>Synedrella nodiflora</i> L	23
6	Zone of inhibition after 48hrs <i>Bacillus</i> sp.	24

LIST OF APPENDICES

APPENDIX		PAGE
A	ANOVA Table	35
B	Certificate of Identification	40
C	Morphological and Cultural Characteristics of <i>Bacillus</i> sp.	42
D	Morphological and Cultural Characteristics of <i>Exiguobacterium</i> sp.	43

LIST OF APPENDIX TABLES

APPENDIX TABLE		PAGE
1	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Bacillus</i> sp. after 12 hours of incubation.	35
2	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Bacillus</i> sp. after 24 hours of incubation.	35
3	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Bacillus</i> sp. after 36 hours of incubation.	35
4	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Bacillus</i> sp. after 48 hours of incubation.	36
5	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 12 hours of incubation.	36
6	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 24 hours of incubation.	36
7	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 36 hours of incubation.	36
8	One-way analysis of variance of the antibacterial activity as eradicant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 48 hours of incubation.	37
9	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Bacillus</i> sp. after 12 hours of incubation.	37
10	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Bacillus</i> sp. after 24 hours of incubation.	37

11	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Bacillus</i> sp. after 36 hours of incubation.	37
12	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Bacillus</i> sp. after 48 hours of incubation.	38
13	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 12 hours of incubation.	38
14	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 24 hours of incubation.	38
15	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 36 hours of incubation.	38
16	One-way analysis of variance of the antibacterial activity as protectant of the selected plant extracts against <i>Exiguobacterium</i> sp. after 48 hours of incubation.	39

LIST OF APPENDIX FIGURES

APPENDIX FIGURE		PAGE
1	Certificate of identification of weeds.	40
2	Certificate of identification of isolated bacteria	41
3	Simple stain	42
4	Point inoculation	42
5	Motility Test	42
6	Broth culture of <i>Bacillus</i>	42
7	NA slant of <i>Bacillus</i> sp.	42
8	Streak plate on petriplate of <i>Bacillus</i> sp.	42
9	Gram stain of <i>Bacillus</i> sp.	42
10	Motility Test of <i>Exiguobacterium</i> sp.	43
11	Broth culture of <i>Exiguobacterium</i> sp.	43
12	NA slant of <i>Exiguobacterium</i> sp.	43
13	Streak plate on petriplate of <i>Exiguobacterium</i> sp.	43
14	Gram stain of <i>Exiguobacterium</i> sp.	43
