

**ISOLATION, SCREENING AND IDENTIFICATION OF PLANT-GROWTH-
PROMOTING RHIZOBACTERIA FROM WEEDY RICE (WR-ILO 4)
ASSOCIATED WITH CULTIVATED RICE (NSIC Rc222)**

MARK JOSEPH RAMOS SABATIN

An Undergraduate Thesis Manuscript Submitted to the Faculty of the Department of Soil
Science, College of Agriculture, Central Luzon State University, Science
City of Muñoz Nueva Ecija in Partial Fulfillment of the
Requirement for the Degree of

**BACHELOR OF SCIENCE IN AGRICULTURE
(Soil Science)**

JANUARY 2020

ACCEPTANCE SHEET

This undergraduate thesis manuscript entitled **“ISOLATION, SCREENING AND IDENTIFICATION OF PLANT GROWTH-PROMOTING RHIZOBACTERIA FROM WEEDY RICE (WR-ILO 4) ASSOCIATED WITH CULTIVATED RICE (NSIC Rc222)”**, prepared and submitted by **MARK JOSEPH R. SABATIN**, in partial fulfillment of the requirement for the degree of **BACHELOR OF SCIENCE IN AGRICULTURE (SOIL SCIENCE)**, is hereby accepted:

PURISIMA E. JUICO, Ph.D.
Adviser

LEYLANI M. JULIANO
Co-Adviser

Date Signed

1-18-20
Date Signed

MARIA LUISA T. MASON, Ph.D.
Critic

MARIA LUISA T. MASON, Ph.D.
Department Research Coordinator

BIOGRAPHICAL SKETCH

The researcher Mark Joseph Sabatin, I was born to Mrs. Lucila Asuncion Ramos and Mr. Gregorio Dela Cruz Sabatin. He hailed from Brgy. Maragol, Science City of Munoz, Nueva Ecija. He valued education since he was young and was always persistent to continue his studies in high school amidst family's financial difficulties. After graduating Elementary at Sapang Cauayan Elementary School, he already sensed his goal to continue in high school education would remain to be just a dream due to poverty. But it seemed that all of the stars in the Universe have aligned while the good Lord sent angels who served as instrument in order for him to realize those dreams. His grandmother Mrs. Adelaida S. Reyes, my grandmother, was the angel sent and in return he help for her in some household chores. He was able to pull off high school studies at Munoz National High School-Main. And was always thankful to her for letting him taste the good life. She did not just provide material things but lessons in life vital to his personal growth. It was indeed true that the journey to the path of success is not an easy and straight road, in fact, it was a winding and a troublesome one. There were times of discouragement to continue what was started, but there is always something inside his mind telling him not to give up the fight.

After high school, another challenge came and indeed the toughest one. With the hardships that he experienced in elementary and high school, be it financial and academic borne, the apprehension to continue in college was the worry. The challenge to stand on his own by not relying on anyone came to his mind. There were SUC's offering free tertiary education, but the awareness that the college education would be financially demanding such as; projects, thesis and everyday allowances. But "este en la mente!" Its only in the mind. He had already withstood the greatest storms in life, and there was no way to give up. Aware that the roads and with the help of friends and family, he would be able to surpass them.

Now once seemingly hopeless child had done his very best to come up with a well-thought college research paper for his beloved Central Luzon State University hoping that he will be able to reap the fruit of his hardships and be able to pay back the persons whom he is indebted to. He is a stone thrown away to finally march to the graduation stage and receive the certificate of achievement The Diploma from the Alma Mater.

ACKNOWLEDGEMENT

This humble piece of work is a product of many sacrifices of the researcher in a limited time, and at times that he has to make all ends meet. For the motivation and guidance in his academic journey, the author would like to convey his sincerest gratitude to the following persons:

Dr. Edgar A. Orden, for playing the role of a father of Central Luzon State University extending his unwavering support to all students who strive to further their knowledge and expertise in their respective courses through this research project.

Dr. Purisima Juico, Research Adviser, for her encouragement and constructive criticisms which helped the proponent to cope up with the challenges imposed by a comprehensive and well-thought research paper like this. Despite of her hectic schedule, she was able to give guidance during the entire course of my study.

Ma'am Leylani Juliano, Reasearch Co-Adviser, who also made significant contributions in the success of this paper. I would like to thank her for the patience that she had bestowed upon me despite of my shortcomings as a student.

Ma'am Editha Evangelista, who challenged me to become a better version of myself through becoming a well-rounded and morally upright student which will be a great help when I step out of the University and look for job opportunities outside.

Ma'am Maria Luisa Mason, his critic, who unselfishly and tirelessly shared his knowledge and specialization in thesis writing making me capable of crafting this research paper.

Ma'am Aurora Waing and Sir Ariel Mactal who provided me not just classroom learnings but also practical knowledge and wisdom which will enable me to further develop my potentials so that I will be more than ready to face the world.

Lola Adelaida S. Reyes, and my uncles and aunties who supported me throughout my college academic journey for playing the role of parents by providing my financial needs.

To my parents, relatives and friends, who have been very supportive during the entire course of the study, the author is likewise indebted to all of you for finishing this paper on time through your moral and financial support. Special mention to Mr. Ronald Magos, one of my friends, who helped me cope up with my academic difficulties without expecting any return.

And lastly, to the Greatest author of this Universe, GOD ALMIGHTY.

--Mark Joseph R. Sabatin
