

**PERFORMANCE OF ORGANIC SUBSTRATE CONCENTRATIONS ON
TOMATO (*Solanum lycopersicum*) PRODUCTION UNDER
DUTCH BUCKET HYDROPONIC SYSTEM**

BHETHEL DIVINE P. JUAN

An Undergraduate Thesis Submitted to the Faculty of the Department of Agricultural and Biosystems Engineering, College of Engineering, Central Luzon State University, Science City of Muñoz, Nueva Ecija, Philippines in Partial Fulfillment of the Requirements for the Degree

**BACHELOR OF SCIENCE IN AGRICULTURAL AND BIOSYSTEMS
ENGINEERING
(AB Land and Water Resources Engineering)**

JUNE 2023

	PAGE
LIST OF TABLES	vii
LIST OF FIGURES	viii
ABSTRACT	xi
INTRODUCTION	1
Background of the Study	1
Statement of the Problem	3
Significance of the Study	4
Objectives of the Study	5
Scope and Limitation of the Study	5
Time and Place of the Study	6
REVIEW OF RELATED LITERATURE	7
Hydroponic System	7
Hydroponic Substrates	8
Coconut Coir	9
Carbonized Rice Hull	10
Physio-chemical Properties of Growing Substrates	11
Tomato Production under Hydroponic System	12
Dutch Bucket Hydroponic System	13
Different Formulations of Hydroponic Substrates used in Tomato	14
METHODOLOGY	16
Conceptual Framework	16
Statistical Design Layout	17
Collection and Preparation of Organic Substrates	17
Determination of the Physio-chemical Properties of Substrates	18
Determination of Bulk Density	18
Determination of Porosity	19
Determination of initial pH and EC of substrates	20
Preparation of Hydroponic System	20
Collection and Preparation of Test Crop	22
Cultural Management	23

Crop Growth Parameters	24
Crop Yield Parameters	25
Data Analysis	25
RESULTS AND DISCUSSION	26
Organic Substrate Concentration	26
Physical Properties of the Samples	27
Chemical Properties of the Samples	27
Growth and Development Parameters	29
Plant Height	29
Leaf Count	30
Plant Yield Parameters	31
Projected Total Harvest	32
SUMMARY, CONCLUSION, AND RECOMMENDATION	34
Summary	34
Conclusion	35
Recommendations	36
LITERATURE CITED	37
APPENDICES	42
Appendix Tables	43
Appendix Figures	52

LIST OF TABLES

FIGURE		PAGE
1	List of materials	22
2	Test of description	23
3	Analysis of physical properties of samples	26
4	Initial pH and EC of substrate concentrations	28
5	Analysis of plant yield in terms of weight and diameter	31

LIST OF FIGURES

FIGURE		PAGE
1	Coconut coir	9
2	Carbonized rice hull	10
3	Tomatoes grown in hydroponic system	12
4	Conceptual Framework	16
5	Preparation of coconut coir	17
6	Preparation of carbonized rice hull	18
7	Determination of bulk density and porosity of samples	20
8	Experimental set-up of hydroponic system	21
9	Cultural management	24
10	Growth of tomato plants from week 1 to week 5	29
11	Leaf count of tomato from week 1 to week 5	30
12	Collection of yield parameter data	32
13	Estimated total harvest in two months	33

LIST OF APPENDIX FIGURES

APPENDIX		PAGE
1	Preparation of coco coir	52
2	Preparation of carbonized rice hull (CRH)	52
3	Determination of the physical properties of samples	53
4	Determination of the chemical properties of samples	53
5	Preparation of Dutch bucket	54
6	Preparation of the experimental set-up	54
7	Transplanting	55
8	Mixing and observation of nutrient solution	55
9	Tomato growth weekly documentation	56
10	Application of fertilizer and pruning	57
11	Harvesting stage	57
12	Collection of yield parameter data	58

LIST OF APPENDIX FIGURES

APPENDIX		PAGE
