BIOGRAPHICAL SKETCH

Alexandria R. Partible was born on July 13, 1998 in Tondo, Manila but currently residing in Gapan, Nueva Ecija. She resided in Manila for 14 years then she moved to Nueva Ecija to study in Central Luzon State University. She had her primary education in Lakan Dula Elementary School, and secondary education in Lakan Dula High School. She was also awarded as a student with honors from Grade 1 to Grade 6, and she also received two class valedictorian awards (1st year and 2nd year) and an honor award (3rd year) in her secondary education. She was a prudent and responsible student that her teachers and her fellow classmates can rely on her.

During her whole stay in CLSU, she received some academic awards such as being a Dean's Lister (A.Y 2015-2016) and College Scholar (A.Y 2016-2017). She also participated in different seminars and conventions related to Psychology such as the 30th annual convention of Psychological Association of the Philippines Junior Affiliates (PAPJA) held in Mall of Asia Arena in January 2017. She was also attended a seminar about Gender Awareness and Sensitivity in November 2015, as well as the one concerning LGBTs in October 2016 that both took place in CLSU.

BIOGRAPHICAL SKETCH

Juwan Louie Cruda Tapia was born on December 31, 1996 to Mr. Joselito Tapia and Mrs. Luisa C. Tapia. Upon writing the study, he is a 21 year old individual residing in Cabanatuan City, Nueva Ecija where was also born and raised in. As a Catholic, he had his primary education in Flowerlane Montessori Children's House in Cabanatuan City, Nueva Ecija and secondary education in Honorato C. Perez Sr Memorial Science High Schol in Cabanatuan City, Nueva Ecija.

Central Luzon State University became his second home from 2014 to 2018 where he studied Bachelor of Arts in Psychology.

ACKNOWLEDGMENT

I would like to express my sincerest gratitude to all the people who helped to accomplish this paper, to our thesis adviser **Mr. Wawie DG. Ruiz**, and critic, **Mr. Angelo R. Dullas** for giving us patience and time to review every revision we made to make this paper more precise and valid.

To my parents, thank you for supporting me mentally and financially. Though you were not there physically because you are working in Manila and United States, I can still feel your full support, so I'm very thankful to you.

To all my classmates, we've been together for 4 years. For the whole time that we've been together, I will never forget the laughs and bond that we had. Even we're so stressed, we always find a way to crack some jokes and pranks just to ease and forget the problems/ stress for a little while. Especially to my best friends (Squares), thank you for the 4 years of friendship. I hope we still see each other in the future.

The accomplishment of this paper would not be possible without the help of those people who provided love, support, and prayers to the researchers during the hardships and challenges faced throughout the course of finishing this paper.

Alexandria R. Partible

ACKNOWLEDGEMENT

To my **Almighty GOD**, who has been our strength and safest haven through it all. For his unyielding and unending love and guidance granted to us. For his nurturing hands who helped us to be a better version of ourselves throughout the course of doing this paper. For the unyielding blessings given to us, that helped us to accomplish the things that we need to finish. For helping us stand whenever we are at our weakest, whenever we fall and can't stand by ourselves, and whenever we start losing hope and all we can feel is despair and all we can see are uncertainties. For never forsaking us despite of all our lapses and inconsistencies. We can never thank him enough for all of these things. All praise and glory is given to him.

To my thesis adviser, **Mr. Wawie DG. Ruiz**, thank you sir for your time, effort, and knowledge from the start and until the end of doing our paper. Thank you sir for those times when we can't find the things you want me to include in our paper, yet, you're still patient with me and still helped me to finish. Thank you sir for helping us to improve this paper. For pushing us to finish this paper. Thank you very much sir!

To my family, **Tapia Family**, thank you for all the support and prayers. Thank you for loving me. Thank you for believing in me most importantly. I love you all.

Above all, to my parents, who never stopped and failed to make us feel loved, cared for, understood, and their never-ending support throughout the accomplishment of this paper. Thank you for all the sacrifices and efforts you've exerted for me, for us, and for our whole family. Thank you for the support you give every time I feel down and I

start losing hope. Thank you, Ma and Pa, for all the love that helped me to keep going, to finish strong. Thank you for understanding me all the time.

For all of the people who participated, helped, trusted, and supported us to finish this thesis and for everyone and everything that made this possible. Thank you very much!

Juwan Louie C. Tapia

ABSTRACT

PARTIBLE, ALEXANDRIA R. AND TAPIA, JUWAN LOUIE C., Department of Psychology, College of Arts and Sciences, Central Luzon State University, Science City of Munoz, Nueva Ecija, Philippines, **JUNE 2018, “ANGELUS REPROBI” EXPLORING INTO CICL’S CRIME-ANALOGOUS BEHAVIOR, HUMAN VALUES, AND PERSONALITY TRAITS**

Adviser: WAWIE DG. RUIZ

Co-Adviser: ANGELO R. DULLAS

This quantitative descriptive-correlational study generally intended to know the relationship between Children-in-Conflict-with-the-Law’s Crime-Analogous Behavior, Schwartz’s Value Theory, and Five Factor Model. It hypothesized that CICL’s Crime-Analogous Behavior that there is a significant relationship towards Values and Traits. Thus, predicting Crime-Analogous through Values and Traits. Result showed that CICL’s dominant values is Universalism while Power is the least dominant values followed by Conservation as the dominant higher value order and Self-Enhancement is the least dominant higher order. The CICL’s dominant Trait is Agreeableness while Neuroticism is the least dominant Trait. The CICL’s dominant Crime-Analogous Behavior is Alcoholism while Vandalism is the least dominant Crime-Analogous Behavior. The findings of the study shows that there is no significant relationship between Behavior, Values, and Traits indicating that Values and Traits does not directly influence Behavior. There is no longer further use for predictive analysis since the correlation results showed no significance. It can be inferred from the findings that Values and Traits has no direct impact towards behavior. However, individual results of each variables provides an interesting implication towards CICL since similar demographics from past studies showed that they should act in

a way that befits them. The results showed a contrasting result and their time in the rehabilitation process might have developed changes in them.
